DETAILED ACTION

The amendment was received to cancel claims 40-45 and adds new claims 74-95.

Claims 1-39 and 46-95 are presented for examination.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12, 14-27, 32-37 and 46-73, drawn to an optical disk recording and reproducing apparatus and method, classified in class 713, subclass 150.

II. Claims 13, 28-31, and 38-39, drawn to an optical disk recording and reproducing apparatus and method in which the control means is to judge whether or not recording or reproducing operation is performed based on the reproduced disk identification information, classified in class 713, subclass 182.

III. Claim 59, drawn to an optical disk deleting method for deleting data from an optical disk, classified in class 713, subclass 189.

IV. Claims 74-95, drawn to a makeup of optical disk recording and reproducing device, classified in class 369, subclass 272.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an optical disk recording and reproducing apparatus and method; invention II has separate

utility such as an optical disk recording and reproducing apparatus and method in which the control means is to judge whether or not recording or reproducing operation is performed based on the reproduced disk identification information; invention III has separate utility such as an optical disk deleting method. See MPEP § 806.05(d).

3. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case group IV is about the makeup of optical disk recording and reproducing device.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for one group is not required for other group, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
